

Planners Comments

The aim was to plan courses with lots of route choice, and then see how the courses fitted in with the colour coded system. The black course came out well, but was between a black and brown, so rather than spoil a good course by adding or removing a bit of distance, the courses were in effect combined into a black.

Please look at routegadget- you may see route choices you didn't see on the day

Thanks for all of your positive comments.

For those of you that had the 800m from the last control to the finish- I hope you saw the 'over or round' route choice.

Thanks also to the controller (Philip Gristwood (MV)) for all his positive comments and help.

Pete Jones

Organisers Comments

Despite the early morning rain, which provided for some refreshing moments during the run, the weather remained bright, if somewhat overcast. I hope that you all enjoyed your runs on an excellent area, well mapped and with first class courses.

All seemed to go well apart from a few people who had to run a different course due to lack of maps. There were 392 entries at the time the maps were ordered but there were over 540 runners on the day. Whilst it is not always possible to enter in advance it is the only sure way of knowing that a map will be available on your course.

The support from SN members was again excellent and my thanks to all of the helpers who gave freely of their time.
